Regional insight: Auckland dominates in raw count (1,638) but Gisborne leads in per-capita risk at 338 per 100k — nearly 4× Auckland's rate. Small regions are systematically underestimated when using raw counts alone. The density-adjusted risk index reveals a very different picture.

WHY THIS MATTERS

If you only show raw counts, Auckland always "wins". But Gisborne's 338 per 100k vs Auckland's 97 tells a completely different policy story. This is the insight that impresses interviewers — knowing when to normalise.

Region	Region Rank	Stolen count	Theft per 100k
Gisborne	7	176	337.81
Nelson	11	92	168.81
Bay of Plenty	3	446	128.27
